

Senior VB.NET Developer – Birmingham

Job Title: Senior VB.NET Developer

Location: Birmingham (Hybrid: 2 days in the office per week)

Company Overview

At Totalmobile, we are passionate about improving work and the lives of mobile workers. As the UK leader in Field Service Management (FSM), we support over 1,000 organisations and 500,000 workers, helping them transform the delivery of field services and achieve an exceptional return on investment.

With 375 staff across the UK and Ireland, we pride ourselves on having the most complete FSM product suite, achieved through a blend of organic growth and strategic acquisitions. This has positioned us as one of the fastest-growing software houses in the UK.

Our workforce rostering solution, Organise, empowers organisations to efficiently build staff rosters, ensuring the right people with the appropriate skills are assigned to the required locations and shifts. This solution, trusted by over 100,000 Emergency Services field workers, enhances the management of timesheets, absence, and sickness, driving increased workforce capacity and efficiency.

We are now embarking on a digital transformation of Organise, migrating the product from on-premises storage to a Cloud-based SaaS model. Alongside this, we will be upgrading the technology stack, moving from legacy technologies to C#, .NET Core, and React.

To support this exciting project, we are assembling a new development team in Birmingham.

Role Overview

We are seeking a Senior VB.NET Developer to join our team and play a pivotal role in modernising our Organise solution. As part of a collaborative development team, you will maintain and enhance the existing platform while contributing to its migration to cutting-edge technologies.

Key Responsibilities

- Develop and maintain the existing VB.NET codebase, ensuring high performance and reliability.
- Work with SQL Server to create, optimise, and manage complex Stored Procedures and Functions.
- Collaborate with cross-functional teams, including Product, QA, and DevOps, to ensure successful delivery of project goals.
- Support the migration of legacy systems to a modern C#, .NET Core, and React technology stack.
- Troubleshoot, debug, and resolve software issues in a timely manner.

Essential Skills and Experience

- A minimum of 5 years' commercial development experience using VB.NET.
- Expertise in SQL Server, including the development and maintenance of complex Stored Procedures and Functions.
- A solid understanding of software development principles and best practices.

Desirable Skills and Experience

- Familiarity with WinForms and WebForms.
- Experience with C# and Azure cloud technologies.
- Previous involvement in large-scale software migrations or transformations.

Why Join Totalmobile?

Be part of a team driving a transformative project within a market-leading organisation. Work on exciting technology upgrades and help shape the future of our flagship product. Enjoy a hybrid working model, with flexibility and opportunities for professional growth. Competitive compensation and benefits package.

Here at Totalmobile, we want our employees to feel valued, appreciated, and free to be who they are at work. We are committed to an inclusive workforce that fully represents many different cultures, backgrounds and viewpoints. We are dedicated to supporting inclusion and diversity at Totalmobile. We actively celebrate colleagues' different abilities, sexual orientation, ethnicity, faith, and gender. Everyone is welcome and supported in their development at all stages in their journey with us.
